

Tekskil 15E LCD Teleprompters

The Professional 15 inch Prompter

Tekskil's 15E 15 inch Prompter Monitors are the ultimate in rugged performance, guaranteed to perform under the most challenging conditions. Custom electronics and optics combine for enhanced readability – the highest rated standard prompting systems available. They incorporate enhanced LCD panels with high performance LED Backlights (improved brightness and contrast), special optics, and surrounded with machined metal enclosures. This heavy duty extruded, yet relatively light weight 'Slimline' enclosure allows us to mount large Aux/Talent Assist Panels to a truss that can be bolted to the underside of the Prompter. This enclosure is robust.

Our innovative modular construction enables you to configure your prompter as a field or Outdoor Broadcasting system, indoor Studio Robotics or as the next Presidential Speech Prompter. Changing is as easy as disconnecting the panel from the quick release plate and retasking with either our field kit or Speech Prompter Conversion Kit. Four different hood configurations, three rail lengths and five different risers will tailor fit any camera and lens, no matter what!

- Tekskil 15" displays will replace most models of QTV, Listec, Autoscript or Telescript CRT and LCD's
- Tekskil prompters are serious all-metal professional grade products – they feature extruded metal enclosures for maximum strength
- Come complete with the latest technology high resolution displays having an **LED** backlight with 700+ cd/m² (nits) of brightness and a 2000:1 contrast ratio
- Can be configured with a front mounted LED Tally light or our TallyCAM or TallyCLOCK Tally Display
- Professional Series can support an Aux/Talent Assist panel dynamically suspended underneath the prompter and dampened free of vibration
- Very affordably priced
