

Tekskil 10P-F ENG Prompter

This little prompter can be read from 20 feet in full sunlight and is very easy to lug around

Professional cameras and tripods are going everywhere owing to impressive improvements in size and weight. Field crews are demanding a prompter that keeps up.

Tekskil has filled the need with our most portable and rugged professional prompter – a 10.4" LED prompter delivering a lot of performance in a small package.

- Readable in full sunlight due to the custom glass laminates and supercharged backlight
- 3 choices of beamsplitter format to match any lens.
- Simple setup - no counterweights, no tools, no fuss.
- An excellent companion for jib cameras.
- Runs from a camera battery for over three hours. And connects directly to vehicle accessory power. Anton Bauer® Gold Mount Battery bracket available.
- Works with any laptop
- Weighs less than 10 pounds and stores neatly in a single case

Perfect for 'Run and Shoot' crews, pan/tilt systems and jib applications

10P-F with Anton Bauer rear mounted Battery Bracket
