

Tekskil Basic Motorized Pedestals (Q60 & Q63)

Tekskil offers two Basic Motorized Pre-Positioning Pedestals – Full Height and the 10 inch shorter Lo-Boy, both with 19 inches of motorized lift.

Is your Talent sitting down in a casual group setting or raised up on a platform behind a desk? Tekskil has a solution for both scenarios. Choose either one of these pedestals and have a solid foundation for your PTZ Camera at a price that is lower than most manual pedestals. With a 90 lbs. payload, even the heaviest systems can be supported. Add 3 local memory presets and an optional tethered remote and it will be difficult to justify anything else – all at a price competitive to purely manual systems!

Add the Q41 Basic Pan Table and have $\pm 185^\circ$ rotation of the Camera Platform with its 3 local memory presets and its tethered remote and you have the best of robotics capabilities at an affordable price. With space for a PS-90 Power Supply inside the forward leg, both Basic Pedestals can supply DC power to accessories without having to have visible external assemblies.

Q60 and Q63 Features:

- 90-pound payload
- 19-inch elevation range
 - Q60: 42 - 61 inch elevation
 - Q63: 32 - 51 inch elevation
- Absolute Positioning
- Local control with 3 position memory
- Built-in Power Distribution (AC & DC)
- Tethered Control (Q52)
- Optional Basic Pan Table (Q41)
- Optional Pan Bar Kit (Q51)
