

Tekskil Motorized Pan Table (Q40)

Tekskil Pre-Positioning Motorized Pan Tables give your PTZ Cameras a ±185° Field of View

More and more stations are adopting automation for improved production and reduced costs. A new breed of integrated pan/tilt/zoom cameras has emerged - PTZs. Utilizing miniature pan tilt assemblies with compact high performance cameras, PTZ systems provide broadcast quality video at a very reasonable cost. However, they come with a headache – PTZ Teleprompters restrict the Field of View (FoV) that the PTZ Camera can see. For our own Q30 capsule, that relationship is: for every 10 feet from the camera the FoV is 24 feet wide. With the premium on floor space, that is never enough. Pan Tables provide the extra Field of View required.

Tekskil Broadcast Products offers the Q40 Network Controlled Motorized Pan Table with 3 local and 100 network memory presets. Tekskil Pan Tables provide absolute positioning such that every preset memory is exactly the same shot as when saved. The Q40 supports 90 lbs. payloads and will couple to any of the Tekskil Motorized Pedestals.

The Q40 Network Integrated Motorized Pan Table when coupled with the Q50 Network Integrated Pedestal and a Network Integrated PTZ Camera will provide your facility with a very powerful and cost effective platform to automate your productions – all controlled through a single Cat-6A cable. Tekskil's Graphical User Interface can act as a Shot Box in preparing your Scripts prior to the final shooting.

Pan Table Specifications	Q40
90 lbs. Payload	Standard
±185° rotation range	Standard
Absolute Positioning	Standard
Remote Local control with 3 position memory	Standard
Network Control with 100 position memory	Standard
DC Power Distribution	Standard
Ethernet Distribution	Standard
Tethered Remote Control	Optional
Requires Tekskil Control Hub and Platform Controller	Optional
