

Tekskil Network Integrated Pedestal (Q65)

A Prepositioning Affordable Alternative to big Robotic Pedestals

The Tekskil Q65 is the foundation of Tekskil's Network Integrated PTZ Teleprompter System. It provides a very stable platform with a 90 lbs. payload. Add to this foundation motorization with 20 inches of elevation and the ability to be controlled via the studio internal network. 100 memory presets are available with absolute positioning. The Tekskil Control Hub and the Tekskil Platform Controller allows the Q65 to be controlled by our GUI Touchscreen Control, the PTZ Camera Control, a Newsroom or even an Automation System.

The Q65 Pedestal also provides DC and AC Distribution as well as Ethernet within the column eliminating cabling headaches. With space for a PS-90 90 watt DC Power Supply inside the forward leg, pedestals can supply DC power to accessories. Mobility is provided by 3 locking casters with cable guards. Built into the right rear leg is an I/O BNC Patch Panel that provides quick connection to the studio and is where all of the video internal wiring connects to the system. Since the system requires hooking up to an AC Mains, three AC Convenience Outlets mounted on the opposite leg prevent having multiple AC Cords strung across the studio floor.

Add the Q45 Network Integrated Pan Table and have $\pm 185^\circ$ rotation of the Camera Platform with its 3 local and 100 network memory presets. Add its optional tethered remote and you have the best of robotics capabilities at an affordable price.

Q65 Features:

- 90-pound payload
- 20-inch elevation range
Q65: 36 - 56 inch elevation
- Absolute Positioning
- Local control with 3 position memory
- Network Control with 100 position memory
- Built-in Power Distribution (AC & DC)
- Built-in I/O BNC Patch Panel
- Built-in Network Distribution (Ethernet)
- Pan Bar Kit (Q51)
- Tethered Remote Control (Q52)
- Optional Network Integrated Pan Table (Q45)
